

Mobile Ecosystem

MyMobile: De-tethering Users from the Desktop Browser

MyMobile: A Must-Have for the Modern Workforce:

In today's fast-paced, digitized, and dispersed work environment, a mobile app isn't just a convenience—it's a necessity. MyMobile empowers businesses to streamline operations and eliminate inefficiencies by meeting users where they are: on their mobile devices. With features like friction-free communication, simplified shopping, automated supply management, and real-time asset tracking, it transforms how work gets done. Free your team from desktop browsers and unlock the power of mobile for faster, smarter, and more productive workflows.

Top 5 Reasons to Choose MyMobile from Digitol

- 1 Friction-Free Communication**
Streamline support with easy ticket creation, order placement, and budget control—perfect for managing spend in dispersed work environments.
- 2 Simplified Shopping Experience**
Eliminate confusion with pre-mapped SKUs in the app, ensuring users quickly find and order what they need without navigating a vast catalog.
- 3 Smart Supply Cabinet Management**
A single QR label tracks all cabinet SKUs, enabling quick stock-takes and automated re-stock orders to save time and reduce errors.
- 4 Effortless Printer & Copier Supplies**
Scan a device's QR code to reorder supplies or submit repair tickets, eliminating device-to-SKU confusion and delays.
- 5 Comprehensive Asset Management**
Track and manage assets by room or employee, no matter their location, ensuring full oversight and operational efficiency.

MyMobile empowers businesses to thrive in a digitized and dispersed work environment by leveraging the convenience of mobile devices. From friction-free communication and simplified shopping to automated supply cabinet management and real-time asset tracking, it streamlines operations and eliminates inefficiencies. Free your team from desktop browsers, reduce errors, and boost productivity with a mobile app designed for smarter, faster workflows.

Scalable Program to Fit Your Needs

Standard Package

- Manage support requests and track assets in one platform.
- Associate assets with the consumables they require for seamless reordering.
- Connect assets to designated service providers for quick and efficient issue resolution.
- Facilities Management with Room QRs: Assign and manage assets by room with scannable QR codes.
- Associate users with specific assets for enhanced accountability and control.

Prestige Package

- All features in Standard, plus:
- Link your app with your e-commerce store for a unified experience.
- Enable users to access pre-approved SKUs directly through the app.
- Simplify purchasing with quick QR code scanning for instant orders.
- Monitor and manage spend with in-app budget tracking features.
- Link Data Collection Agents to view device statuses and eliminate consumables confusion.

VIP Package

- All features in Prestige, plus:
- Just-in-Time Replacement (JIT-R) for Ink & Toner: Automate reordering for consumables, reducing downtime.
- Ensure accurate and consistent consumable matches for every device.
- Simplify supply cabinet restocking with QR codes and automated order calculations.
- Optimize freight movements for reduced shipping costs and environmental impact.
- Track and manage consumables to empty, minimizing waste and maximizing efficiency.

Streamline operations with MyMobile, reducing PO cycle times and tail-end spend while minimizing waste. Achieve greater efficiency and environmental impact with optimized processes and smart automation.
